- (4) **What must be included in assessing a development application?**
When determining a development application required by this clause, the consent authority must assess the extent to which the carrying out of the proposed development would affect the heritage significance of the heritage item or heritage conservation area concerned.
- (5) The assessment must include consideration of:
- (a) for development that would affect a heritage item:
 - (i) the heritage significance of the item as part of the environmental heritage of the City of Ryde, and
 - (ii) the impact that the proposed development will have on the heritage significance of the item and its setting, including any landscape or horticultural features, and
 - (iii) the measures proposed to conserve the heritage significance of the item and its setting, and

- (v) whether any landscape or horticultural features of heritage significance would be affected, and
- (vi) whether any archaeological site or potential archaeological site would be affected, and
- (vii) the extent, if any, to which the carrying out of the proposed development would affect an historic subdivision pattern.

(6) What extra documentation is needed?

When determining whether or not to grant a development consent required by this clause, the consent authority:

- (a) must not grant such a consent until it has considered a heritage impact statement which includes an assessment of the matters raised in subclause (5) (a) or (b), as the case requires, and
- (b) where it requires that a conservation management plan should also be considered, may refuse to grant the consent unless a conservation management plan has been considered.

87 Notification of demolition to Heritage Council

Before granting consent for the demolition of a heritage item that is identified in Column 4 of Schedule 15 as being of State significance, the consent authority must notify the Heritage Council about the application and take into consideration any comments received in response within 28 days after the notice is sent.

- (2) This clause extends to development:
 - (a) that may have an impact on the setting of a heritage item, for example, by affecting a significant view to or from the item or by overshadowing, or
 - (b) that may undermine or otherwise cause physical damage to a heritage item, or
 - (c) that will otherwise have any adverse impact on the heritage significance of a heritage item or of any heritage conservation area within which it is situated.
- (3) The consent authority may refuse to grant any such consent unless it has considered a heritage impact statement that will help it assess the impact of the proposed development on the heritage significance, visual curtilage and setting of the heritage item.
- (4) The heritage impact statement should include details of the size, shape and scale of, setbacks for, and the materials to be used in, any proposed buildings or works and details of any modification that would reduce the impact of the proposed development on the heritage significance of the heritage item.
- (5) In considering any development application in the area bounded by Terry Road, Darvall Road, Denman Street and Brush Road, Eastwood, the consent authority must consider the possible impact on the heritage significance of Brush Farm Park and Brush Farm House.

89 Development of Aboriginal places or of known or potential archaeological sites of Aboriginal cultural significance

Before granting consent for development that is likely to have an impact on an Aboriginal place, or that will be carried out on an archaeological site that is identified in Column 4 of Schedule 15 as being of Aboriginal significance or a potential archaeological site that is reasonably likely to have Aboriginal cultural significance, the consent authority must:

- (a) consider a heritage impact statement explaining how the proposed development would affect the conservation of the place or site and any relic known or reasonably likely to be located at the place or site, and

- (b) except where the proposed development is integrated development, notify the local Aboriginal communities (in such way as it thinks appropriate) and the Director-General of National Parks and Wildlife of its intention to do so and take into consideration any comments received in response within 28 days after the relevant notice is sent.

90 Development of other known or potential archaeological sites

- (1) Before granting consent for development that will be carried out on any other archaeological site or potential archaeological site, the consent authority must:
 - (a) consider a heritage impact statement explaining how the proposed development would affect the conservation of the site and any relic known or reasonably likely to be located at the site, and
 - (b) notify the Heritage Council of its intention to do so and take into consideration any comments received in response within 28 days after the notice is sent.
- (2) Subclause (1) does not apply if the proposed development will not involve disturbance of below-ground relics and the consent authority is of the opinion that the heritage significance of any above-ground relics would not be adversely affected by the proposed development, or the proposed development is integrated development.

91 Conservation incentives

The consent authority may grant consent to the use for any purpose of a building that is a heritage item, or of the land on which a heritage item is erected, even though the use would otherwise not be allowed by this plan, if:

- (a) it is satisfied that the retention of the building or item depends on the granting of consent, and
- (b) the proposed use is in accordance with a conservation management plan which has been approved by the consent authority, and
- (c) the granting of consent to the proposed use would ensure that all necessary conservation work identified in the conservation management plan is carried out, and

- (b) the style, size, proportion and position of the openings for windows or doors (if any), and
- (c) whether the colour, texture, style, size and type of finish of the materials to be used on the exterior of the building are compatible with those of the materials used in existing buildings within the heritage conservation area.

CONTAMINATED LAND MANAGEMENT ACT 1997

Section 21

Declaration of Remediation Site

Declaration Number 21042

THE Environment Protection Authority (EPA) declares the following land to be a remediation site under the *Contaminated Land Management Act 1997*:

1. Land to which this declaration applies ("the site"):

Those parts of Lot A in DP102760 located at 79 Wilson Street, Newtown, NSW, in the South Sydney Local Government Area.

2. Nature of the substances causing the contamination ("the contaminant"):

Petroleum hydrocarbons that have migrated from the adjacent service station site.

3. Nature of harm that the substance may cause:

The Environment Protection Authority has considered the matters in section 9 of the *Contaminated Land Management Act 1997* and found that:

- Total petroleum hydrocarbons (TPHs: C6-C9) have been detected in the soil in the basement of the residence on the land to which this declaration applies. The level of TPHs is approximately 20 times the criteria for sensitive land uses such as residential premises.
- Significant hydrocarbons odours have been detected coming from the soil in this basement, and workmen vacated the basement during construction activities in 2001.
- Levels of TPHs (C6-C9) that are above criteria have also been detected in the soil at the adjacent service station.

The site is contaminated with the contaminant in such a way as to present a significant risk of harm to human health and the environment. In particular:

- The International Agency for Research on Cancer (IARC) has classified gasoline mixtures as Group 2B (Agents possibly carcinogenic to humans).

4. Further action under the *Contaminated Land Management Act 1997*

The making of this declaration does not prevent the carrying out of a voluntary remediation of the site and any person may submit a voluntary remediation proposal for the site to the Environment Protection Authority. If the Environment Protection Authority is satisfied the proposal meets the requirements of section 26 of the *Contaminated Land Management Act 1997*, the Environment Protection Authority may agree not to issue a remediation order to a party to the proposal, if the remediation is carried out in accordance with the proposal.

5. Submissions invited

The Environment Protection Authority advises that the public may make written submissions to the Environment Protection Authority on:

- whether the Environment Protection Authority should issue a remediation order in relation to the site and/or

- any other matter concerning the site.

Submissions should be made in writing to:

Director Contaminated Sites
Environment Protection Authority
PO Box A290
SYDNEY SOUTH NSW 1232

or faxed to: 02 9995 5930

by not later than **31 January 2003**.

NIALL JOHNSTON,
Acting Director Contaminated Sites
Environment Protection Authority
(by Delegation)

Date: 17 January 2003

NOTE:

Remediation order may follow

If remediation of the site or part of the site is required, the Environment Protection Authority may issue a remediation order under section 23 of the *Contaminated Land Management Act 1997*.

Variation/Revocation

This declaration remains in force until it is otherwise varied or revoked. A declaration may only be revoked when the Environment Protection Authority does not have reasonable grounds to believe that land is contaminated in such a way as to present a significant risk of harm (section 44 of the *Contaminated Land Management Act 1997*).

Information recorded by the Environment Protection Authority

Section 58 of the *Contaminated Land Management Act 1997* requires the Environment Protection Authority to maintain a public record. A copy of this declaration will be included in the public record.

Information recorded by councils

Section 59 of the *Contaminated Land Management Act 1997* requires the Environment Protection Authority to inform the relevant local council as soon as practicable that this declaration has been made. The council is then required to note on its planning certificates issued pursuant to section 149 (2) of the *Environmental Planning and Assessment Act 1979* that the land is currently within a remediation site. The Environment Protection Authority is required to notify council as soon as practicable when the declaration is no longer in force, and the notation will no longer be required on the certificate.

Relationship to other regulatory instrument

This declaration does not affect the provisions of any relevant environmental planning instruments which apply to the land or provisions of any other environmental protection legislation administered by the EPA.

CONTAMINATED LAND MANAGEMENT ACT 1997**Section 21****Declaration of Remediation Site****Declaration Number 21036**

THE Environment Protection Authority (EPA) declares the following land to be a remediation site under the *Contaminated Land Management Act 1997*:

1. Land to which this declaration applies (“the site”):

Declaration of former IWC landfill, Lucas Heights, comprising parts of Lot 2 DP605076 and Lot 2 DP1032102, in the local government area of Sutherland Shire Council.

2. Nature of the substances causing the contamination (“the contaminant”):

The site is contaminated with chemicals including heavy metals, ammonia, total petroleum hydrocarbons, polycyclic aromatic hydrocarbons, volatile organic compounds, and various other chlorinated alkanes and alkenes due to former landfilling activities.

3. Nature of harm that the substance may cause:

The Environment Protection Authority has considered the matters in section 9 of the *Contaminated Land Management Act 1997* and found that:

- Contaminants which are carcinogenic and otherwise toxic to humans and toxic to aquatic organisms

(including heavy metals, polycyclic aromatic hydrocarbons, phenols and volatile organic compounds) are present in soil, surface waters and groundwaters at the IWC site;

- There is no effective leachate collection strategy at the site;
- Contaminants are migrating offsite, via leachates and groundwaters, at concentrations which may adversely impact downgradient ecological receptors (including aquatic ecosystems and wildlife such as birds, reptiles and mammals).
