

Incident Reporting in Schools

Release 2, 2023 (1 July 2023 – 31 December 2023)

How schools manage the safety and security of its students and staff.

Our schools are among the safest places in our community for children and young people. However, from time to time, incidents do affect schools just as they affect communities and society as a whole. In the event of an incident occurring the safety and wellbeing of students, staff and others is the first priority. Incident notification enables the department to act to provide early intervention, management and support where required and take corrective action to prevent further incident or injury. The Incident Report and Support Hotline is staffed by NSW Police Officers who provide advice to employees about school-related offences. A report to the Incident Report and Support Hotline brings an incident to the attention of police, in line with requirements under the Crimes Act

The Incident Report and Support Hotline is available to assist principals 24 hours a day, seven days a week. Senior police and incident support officers in the unit provide immediate support and advice on the management of any school-related incident reported.

Through the NSW Department of Education's commitment to improving transparency and ease of access to information, incident reports are being made available to the public. In doing so, the Department is committed to the welfare of students and staff in NSW public schools. As such, references have been removed which could expose a person to a risk of harm or which reveals the identities, or the personal/health information of students, school staff and community members. Information that may prejudice an investigation has also been removed.

Publishing these reports informs the community about incidents in public schools and how the Department supports schools through incidents while still protecting the identity of students and staff.

The introduction of a new incident reporting database in January 2019 has changed the format of the information presented and the release of individual incident reports. Schools are required to report incidents to the Incident Report and Support Hotline relating to activities such as violence; misuse of substances; weapons; welfare; emergency situations; and malicious use of technology if there is a concern for the safety to the student.

The restructure of categories enables the Department to better identify areas of risk to facilitate additional support and training delivered by the Health, Safety and Staff Wellbeing Directorate, which in turn serves to assist the ability of school to effectively manage incidents when and if they occur.

To align with the Department's 8 Operational Directorates and 110 Principals Networks, incidents are now recorded and reported by Principals Network. Future comparative reporting based on the improved incident reporting system will further assist in the analysis of data and subsequent targeted support to schools.

The number of incidents that are reported from one date range to the next do vary and this is an expected fluctuation due to the relatively small number of incidents that are reported from more than 2,200 schools with a student population in excess of 810,000. Consequently, the percentage variations are not significant and the relatively small number of incidents indicates that schools continue to be one of the safest places for students in our community.
