

NSW Foundation Spatial Data Framework:

Transport Theme

Dataset/product title: Road Associated Facilities

Image depicts sample of the Road Associated Facilities dataset © DFSI Spatial Services 2018

Dataset/product description	<p>Various facilities associated with the Road dataset.</p> <p>The following are 'facility points' being a point feature class defining a facility related to transport.</p> <p>Bus Interchange A connection or terminal point for long distance bus travellers or other major transport interchange.</p> <p>Parking Area An area set aside for the parking of motor vehicles.</p> <p>The following are 'traffic control devices' being a point feature class representing structures which control movement of traffic along a road.</p> <p>Level Crossing A place where a road and railway intersect at the same level.</p> <p>Toll Booth A structure on a road which requires the user to pay a toll or fee to use the road.</p>
------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	<p>Impediment A structure generally associated with a road that controls or varies the normal travel of vehicles or pedestrians.</p> <p>Roundabout The notional midpoint of a roundabout that has been constructed to allow smooth integration of traffic.</p> <p>Gate An opening in a fence or wall for the passage of vehicles or animals and which may contain a device to limit passage.</p> <p>Cattle Grid An open floored structure designed to be crossed by motor vehicles.</p>
Dataset uses	<p>Transport data is used for:</p> <ul style="list-style-type: none"> • delivering emergency services • mapping, charting and navigation • planning for and delivering resources and services • asset management • infrastructure planning and development.
Current status	<p>Spatial Services continuously updates this theme with information sourced from relevant stakeholders and custodians, by data verification from other internal and external databases, by field investigation and research, as well as through Spatial Services regular cycle of updating aerial imagery.</p>
Standards and specifications	<p>Metadata for the relevant Spatial Services datasets are required to comply with AS/NZS ISO 19115 ANZLIC Metadata Profile v1.1, ISO 19115-2 and ISO 19139.</p>
Access and licensing	<p>Spatial Services, a division of the Department of Finance, Services and Innovation (DFSIS) creates and manages Intellectual Property for the Crown in right of New South Wales.</p> <p>Acquisition of this data is subject to the customer entering into an appropriate Creative Commons license agreement.</p> <p>To the extent that Creative Commons licensing applies, all data and other material produced by Spatial Services constitutes Crown copyright.</p> <p>Spatial Services has applied the Creative Commons Attribution 3.0 Australia Licence. Spatial Services asserts the right to be attributed as author of the original material in the following manner:</p>
