THE
SYDNEY HARBOUR TRUST COMMISSIONERS'
TWENTY-FIRST REPORT

BEING FOR THE
YEAR ENDED 30th JUNE, 1921.

Printed under No. 5 Report from Printing Committee, 10 November, 1921.

SYDNEY : WILLIAM APPLEGATE GULLICK, GOVERNMENT PRINTER.

TWENTY-FIRST REPORT

OF THE

SYDNEY HARBOUR TRUST COMMISSIONERS,

FOR THE

YEAR ENDED 30th JUNE, 1921.

Sydney Harbour Trust Offices,
Circular Quay, 1 September, 1921.

THE Sydney Harbour Trust Commissioners have the honor to submit to the Honorable the Colonial Treasurer, for presentation to Parliament, their report for the year ended 30th June, 1921.

Receipts.—The revenue collected during the year amounted to £797,211 3s. 9d.

Revenue Expenditure.—Working expenditure, including the Commissioners' salaries, amounted to £224,676 1s. 8d.

Renewals and Replacements.—The amount expended under this head was £20,088 1s. 1d., which has been charged against the surplus.

Capital Expenditure.—The outlay from Loan Votes during the year amounting to £492,149 8s. 5d.

Capital Debt.—The Capital Debt at 30th June, 1921, amounted to £9,449,213 0s. 10d.

Interest.—The interest on Capital Debt for the year amounted to £438,210 4s. 2d.

Surplus.—The surplus for the year's transactions, after deducting £20,088 1s. 1d. for renewals and replacements, amounted to £114,236 16s. 10d.

Gross revenue shows a return of 8.66 per cent. on capital as compared with 7.46 per cent. for the previous year. Net revenue 6.22 per cent. against 5.34 per cent. for the previous year. Net surplus 1.24 per cent. against 1.12 per cent. in the previous year.

The ratio of working expenses (excluding interest and renewals) to gross revenue is 28.18 per cent. against 28.32 per cent. for the previous year.

Trade of the Port.—During the year ended 30th June, 1921, the total number of vessels entering the port was 8,698, with a gross registered tonnage of 12,408,695 and a net tonnage of 7,236,255, showing an increase in comparison with the previous year of 1,153 vessels, and an increase in gross tonnage of 2,472,267.

Imported goods also showed an increase over the previous year, being 4,231,112 tons as against 3,427,486 tons for the year ended 30th June, 1920.

				Year ended 30th June, 1920.		Year ended 30th June, 1921.
Deep-sea	...	...	...	969,714	...	1,293,015
Interstate	...	...	...	794,258	...	788,986
State	...	...	...	1,663,514	...	2,149,111

The value of goods imported from all sources was £105,543,014, as against £75,912,824 for the previous year.

The value of oversea exports, exclusive of gold, was £48,671,651, as compared with £51,848,000 for the year ended 30th June, 1920.

It will be seen by the returns that the number of ships and the figures of total tonnage of vessels entering the port approximate to those of pre-war periods. This, however, does not represent the general trade activity that might be expected, seeing that many vessels have been brought to the port in ballast for the purpose of transporting wheat and other primary products, and the regular traders have arrived with comparatively small inward cargoes. One of the reasons for this is that an increasing number of items which have hitherto been imported have, since the outbreak of the war, been manufactured in New South Wales. In order that a clearer estimate of the position may be obtained, the Commissioners have added to the appended list of the quantities of imported goods a column showing these importations in 1914, for comparison with the year under review. A graph has also been added showing oversea trade fluctuations by which volume pf trade can be estimated as distinct from value.

Construction of Works.—During the period under review the Commissioners spent the sum of £492,149 in carrying out improvements to the port.

Another of the new jetties at Walsh Bay has been completed, and the last jetty, which will bring about the completion of this scheme, is nearly finished. The construction of the reinforced concrete viaduct to connect the upper stories of these jetties to Windmill-street has been retarded by reason of the shortage of cement; and, on account of the high price of steel, the Commissioners have not seen their way to order the bridges. They have, however, now decided to carry out these bridges in timber, and, as the concrete viaduct is now being actively proceeded with, the full benefit of the connection with the upper stories of these jetties will soon be experienced.

Although the Commissioners have not yet obtained possession of the Kent-street Gas-works site they have, by arrangement with the Gas-light Company, constructed a temporary roadway 30 feet in width through the works, thus connecting Hickson-road with Sussex-street. The large amount of traffic which immediately passed over this road is evidence of the necessity for the main port roadway. The Commissioners expect to be in possession of the works towards the end of 1921, when they will proceed with the permanent roadway and the wharfage on the foreshore of this property.

Now that the bulk-wheat handling scheme at Glebe Island is approaching completion, the Commissioners expect shortly to obtain possession of the Wheat Jetty and the Darling Island Wharf where bagged wheat loading has hitherto been carried out. These wharves will then be remodelled and used for general shipping purposes, and will greatly add to the cargo handling facilities of the port.

Entrance Channels.—Dredging of the original bottom of the port in the Western Channel has been continued, and, with the exception of a small patch which will shortly be removed, it now carries a uniform depth of 40 feet over a minimum width of 400 feet. This channel is now being used by large vessels entering the port. Dredging operations will continue until a width of 700 feet has been obtained.

The Eastern Channel maintains its depth of 40 feet at L.W.S.T. over a width of 700 feet without dredging, but the Commissioners propose to improve its direction as soon as the work on the Western Channel has been completed.

Ferry Services.—During the year the number of passengers carried by the various ferry services was 40,684,700, as against 40,930,513 during the previous year.

NOTS.—The tonnage of Oversea and Interstate vessels which proceeded to Newcastle and then returned to the port with bunker coal is Included in the figures representing the not tonnage of Oversea and Interstate arrivals. The tonnage for the year ended 30th June 1921, when compared in the aggregate with that for the year ended 30th June, 1920, shows an increase of 1,432,869 tons net. and an increase of 2,472,267 tons gross ; steam vessels show an increase of 1,195 ; and sailing vessels show a decrease of 42. During the year 1917-1918, however, the shipping figures were affected by the general industrial strike, and again in 1918-1919 by the seamen's strike, and in 1919-1920 by the engineers' strike, and in 1920-1921 by the engineers' and the stewards' strikes. On account of the outbreak of war on 4th August, 1914 the shipping of this port has been considerably affected, as indicated by the figures for the years ended 30th June, 1915, 1916, 1917, 1918, 1919, 1920, and 1921.

sydney: Williams Applegate Gullick, Government Printer - 1921.

Walsh Bay Wharfage
(approaching completion).

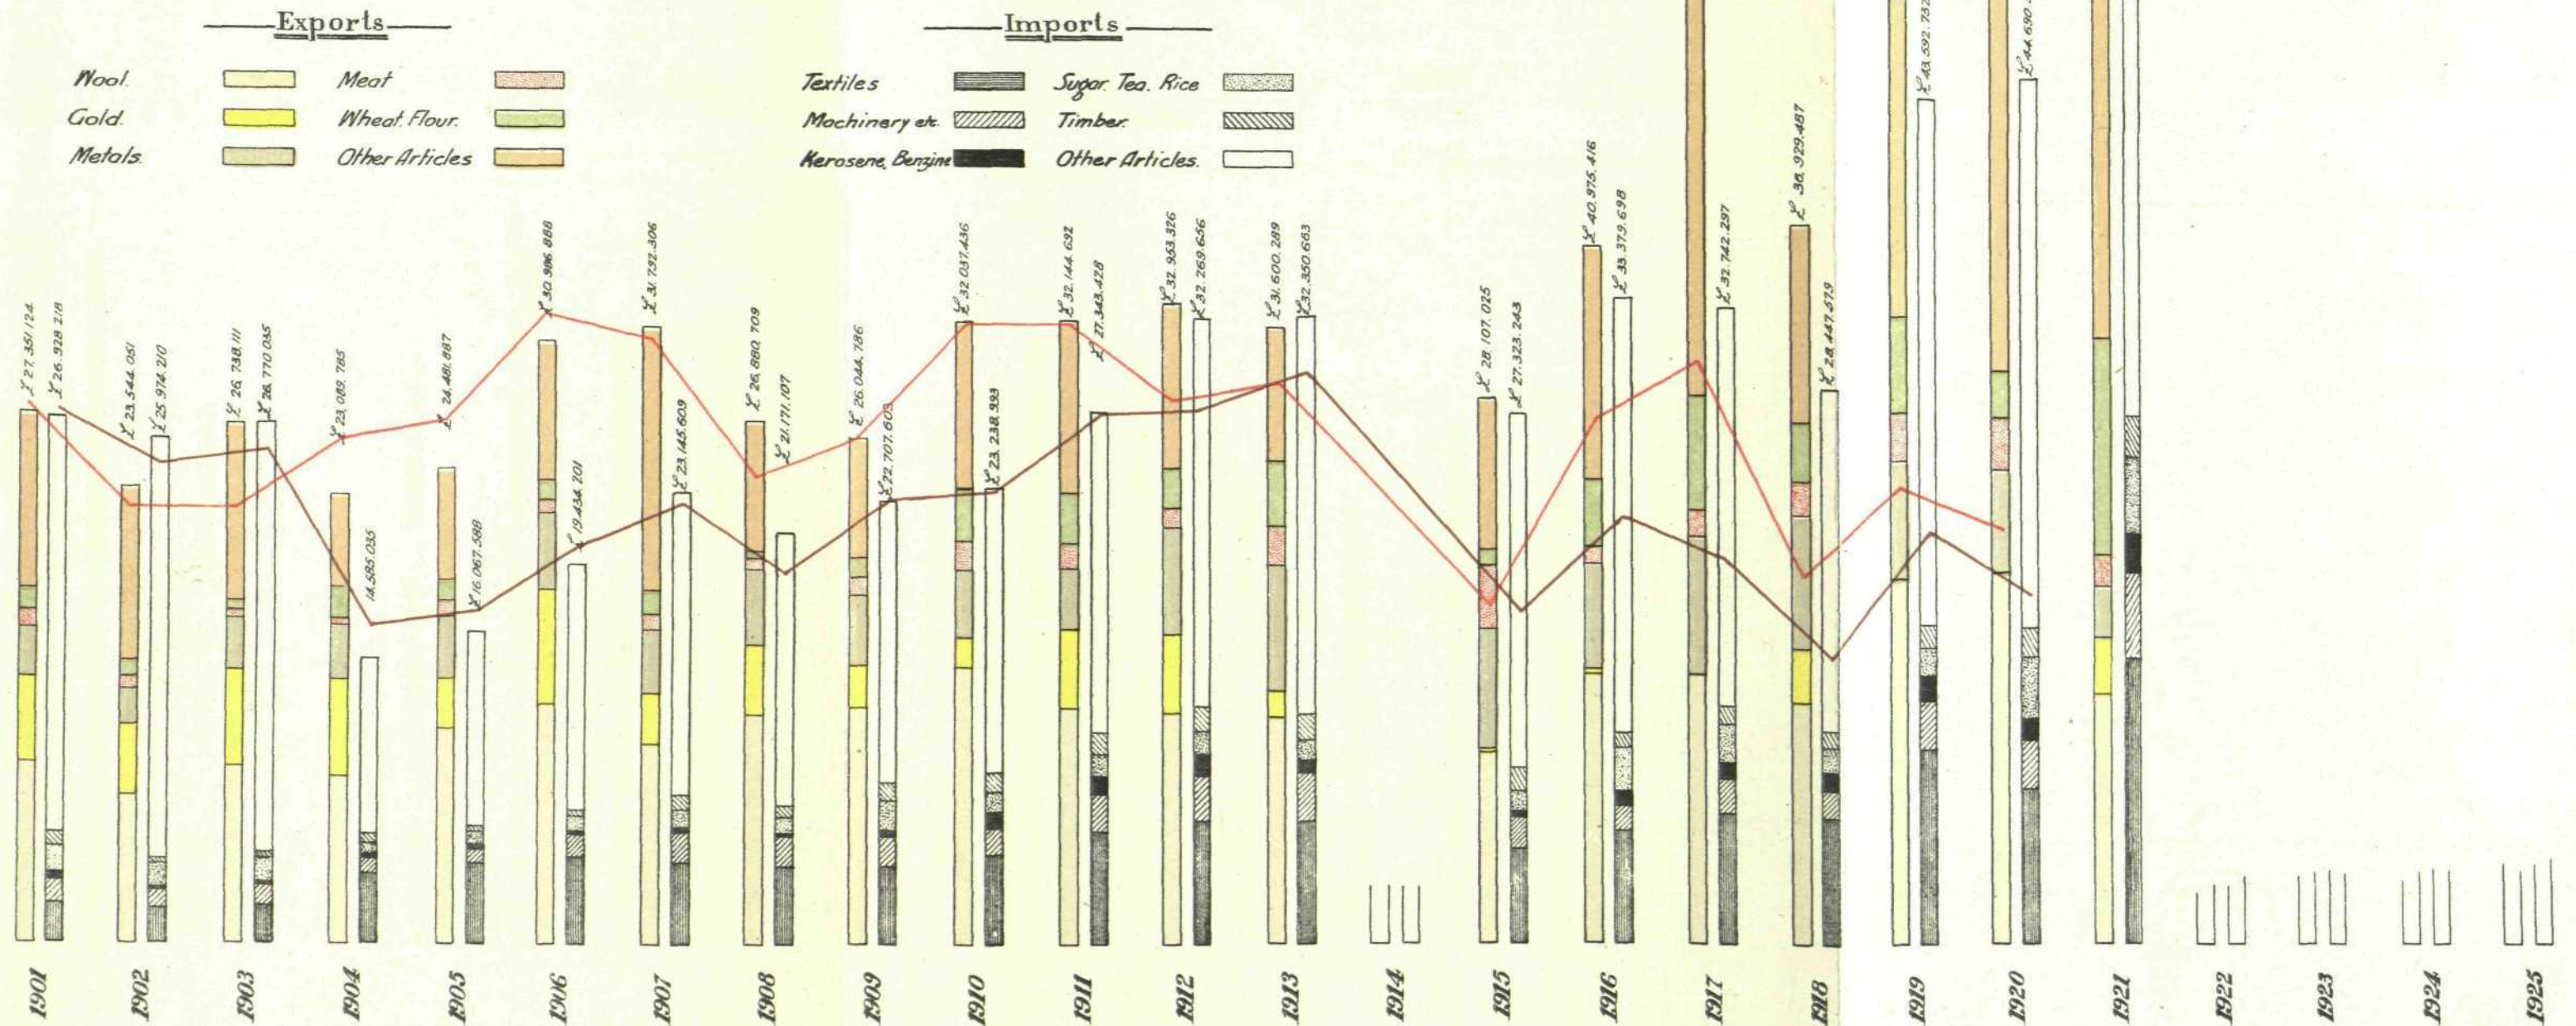

Sydney Harbour Trust

Diagram showing Values of Oversea Exports and Imports New South Wales
1901 to 1921

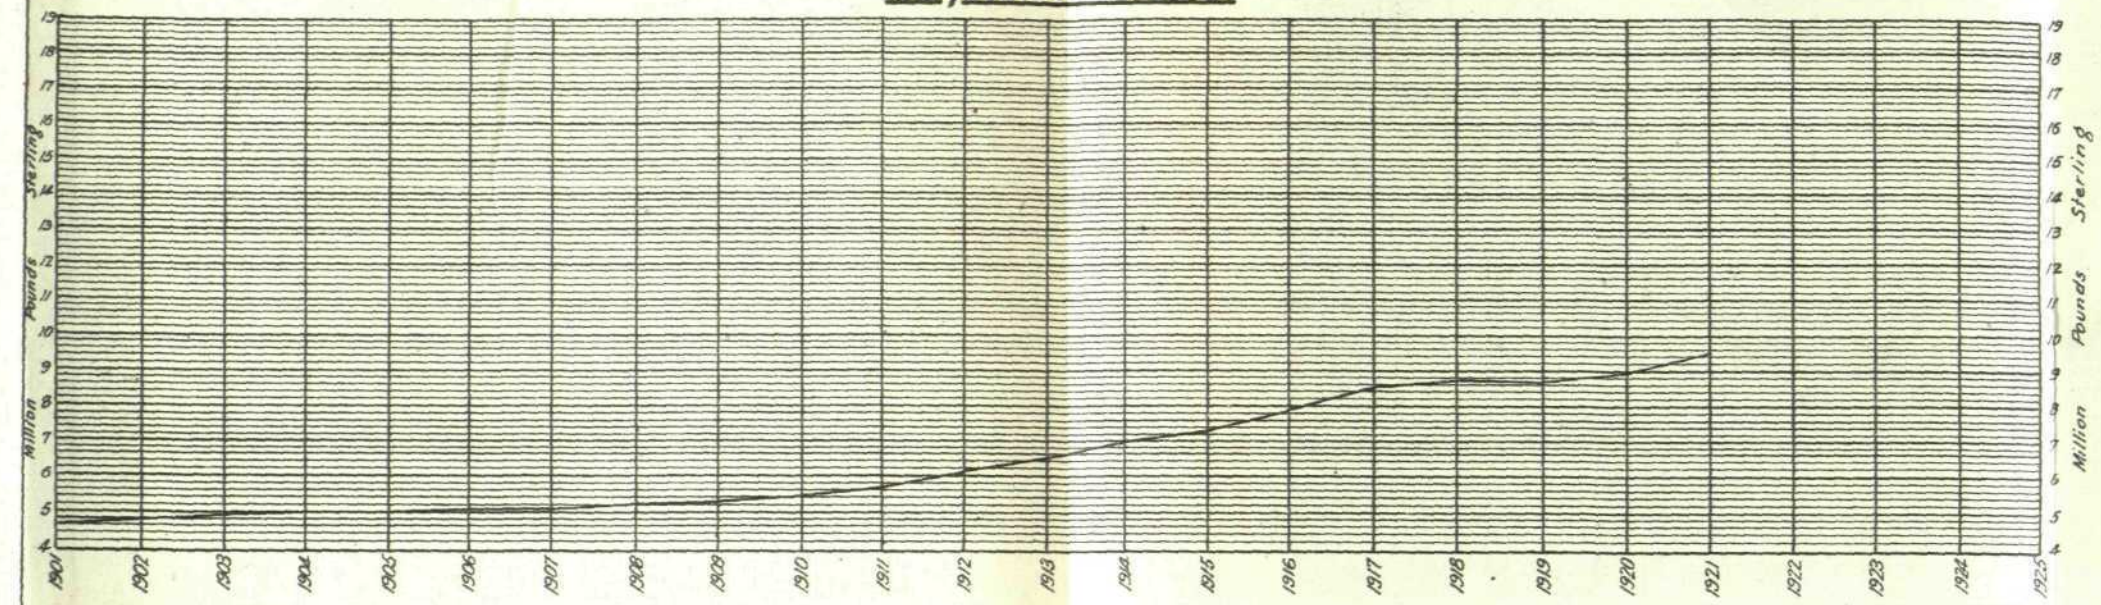

Note:

The Redund Brown Lines represent equivalent values of Imports and Exports respectively for the different years on the basis of 1911 current wholesale prices (e.g. the values as given by the lines for 1920 represent the values of Imports and Exports had the wholesale prices of 1911 been maintained. Considering the matter from another point of view these lines are also a measure of the quantities of Imports and Exports for the different years) Approximately 93% of the Trade passes through the Port of Sydney.

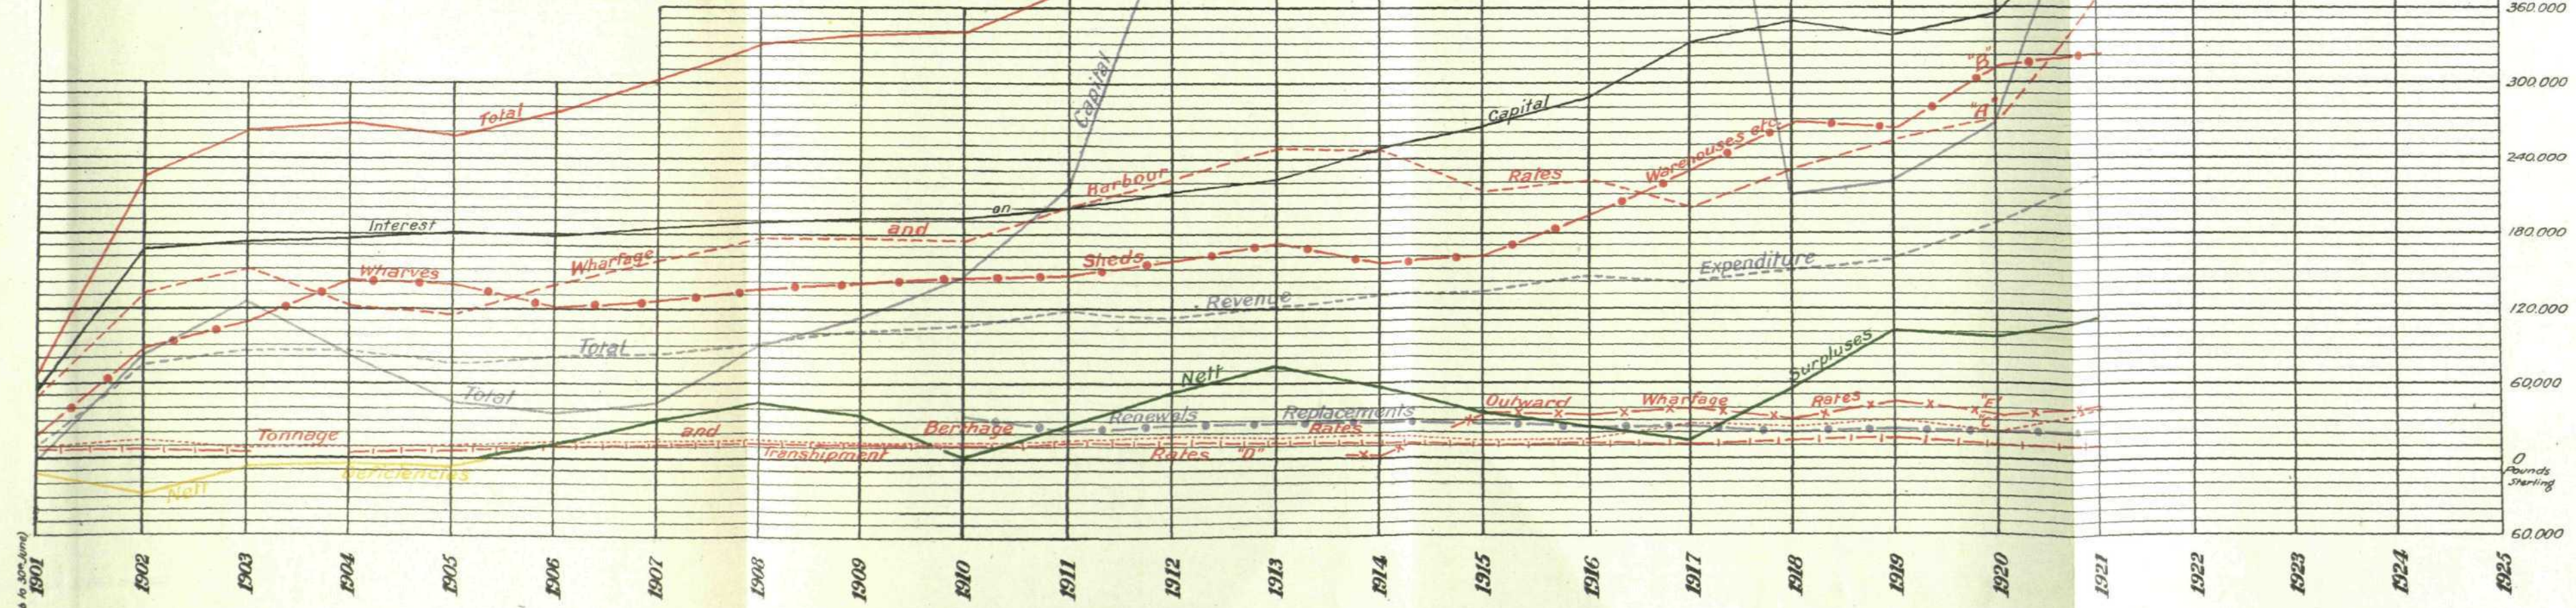

W. Sedgwick
Engineer-in-Chief
30/6/21
