I HAVE carefully examined the foregoing comparative statement of the number of officers employed and the salaries paid as at 30th June, 1905, and 30th June, 1906, and the statement showing particulars of increases and decreases in the number of officers and salaries paid in the various Departments for the like periods, and compared them with the detail returns furnished by the various Departments, and certify that they correctly present a comparison between the number of officers employed and the salaries paid during the financial years 1905 and 1906. I have also examined the detailed statements of the various Departments, showing the causes of increase or decrease, and certify to the correctness of the information disclosed in the statement for 1906 as compared with that for the year ended 30th June, 1905. The compilation and checking of the return disclosed some few errors of omission, &c., on the part of some of the Departments, relating to the year ended 30th June, 1905, previously published; these, however, have been rectified in the present statement.

NOTE.

The Public Service Board desire to state, for general information, that the plan adopted in preparing this list is to place the officers in the various divisions in order of salary, and, where there is more than one officer at the same salary, then to place the officers in alphabetical order of their names. It is therefore in no sense a "Seniority List."

In the *General Division* grades are not specified. Under the provisions of Nos. 383 and 455 of the Regulations under the "Public Service Act, 1902," the upper and lower grades of the *Special*, *Professional*, *Educational*, and *Clerical Divisions* are divided into sections, as under:—
